MILLER BROS. CONSTRUCTION IN-HOUSE ENGINEERING SERVICES

## ADDRESSING THE NEED FOR GREATER SPEED IN INDUSTRIAL AND COMMERCIAL DEVELOPMENT AND CONSTRUCTION

Miller Bros. Construction offers in-house engineering services to our construction clients to move from engineering concept through design to project completion as quickly as possible.

- Land Development
- Site Construction
- Shop Drawings
- Permitting
- Approvals
- Building Plans
- Design-Build
- Building Construction

*“ Miller Bros. in-house engineering services significantly reduce the time required for project engineering, design development and permitting.”*

In-house engineering services bring better control and greater time compression to many construction projects.

In an industrial environment this means faster progress through the permitting stage and quicker completion for new structures and/or renovations including trench drains, equipment pads, foundations, loading docks and other site improvements.

Please contact Rick Lettich or Ed Davis, P.E. for a no-obligation project consultation
